

## ALL THE QUALITY ASSURANCES YOU'LL REQUIRE

Talking about our track record is one thing. Proving it is another. That comes with working together, but please bear in mind we are ISO 9001-2008 certified, CQI-12 certified and have invested in ERP, QMS and MOM systems. We are compliant with a wide range of specifications from a variety of industries and continue to maintain our longstanding record of greater than 98% on-time delivery.

## Put Us To The Test

Of course we mention all this to convince you that DECC deserves to be on your short list to call whenever you have a new coating challenge or if you suspect a new coating solution could produce greater value in an existing application. We hope you'll put us to the test soon.

# Coating Challenges Solved

## Credibility by Association?

If you're known by the company you keep, we're proud to be known as a valued supplier to hundreds of companies. Listed below are a few examples of the customers we've served. We hope it shows that we can meet your needs as well.

We were formed in 1964, and have since become a leading custom coating solution provider. For many years we focused on the automotive and transportation industries. However, as autos and heavy equipment have evolved to use a wider variety of materials and technologies, we've diversified into fields with common needs, such as aerospace, alternative energy, food service and medical equipment, furniture and military equipment.

To meet the challenge takes much more than manufacturing expertise. It also takes engineering talent. We offer highly qualified and experienced problem-solvers who look beyond the coating and take a more holistic approach to meeting customer specifications with maximum value.

All told, in nearly 50 years of operation, we've served more than 500 companies and completed thousands of projects. During those years, we've tackled a seemingly endless variety of challenges. A few are summarized on the next panel.

The conclusion? We hope you agree DECC deserves consideration for addition to your list of approved suppliers. We welcome the chance to earn your business.

### Glass Equipment Manufacturer

Diagnosed and solved a glass production failure with a coating solution that increased production run times before change out by 17 times.

### Office Furniture Manufacturer

Applied a new abrasive-resistant coating to office chairs which led to a decrease in returned chairs under warranty and restored consumer confidence in the quality of the product.

### Auto Supplier

Two months before the launch of a new truck line, DECC jumped in and created an electrostatic coating application that solved a rear lift gate issue. As a result, the supplier saved face (and money) by launching the program as scheduled.

### Tire Manufacturer

Careful analysis led to a dry film, abrasive-resistant lubricant to be applied to the tires' bead rings. This virtually eliminated the excessive equipment cleaning that was previously necessary in between cycles, saving the company time and money.

### Medical Instrument Manufacturer

After trying at least a few dozen suppliers, only DECC was able to provide a custom coating solution to a part used in open heart surgery.

#### Industry

#### Customer

#### Automotive

World leader in the supply of driveline products, power technologies and genuine service parts for light and heavy manufacturers

#### Diesel

World-wide leader in the manufacturing and design of diesel engines

#### Furniture

Global leader in the office furniture industry

#### Military

Market leader in business aviation; land and expeditionary combat vehicles and systems, armaments, and munitions; shipbuilding and marine systems; and mission-critical information systems and technology

#### Aerospace/ Avionics

Market leader in the manufacturing and distribution of hydraulic hoses, fittings, adapters and couplings

### A Pipeline to Global Coatings Experts

Another important point when working with DECC, you – and we – gain valuable access to the expertise of the world's leading coatings suppliers. We've earned preferred customer status from these leading companies...and that means you do, too. The result? Our combined materials, applications and process knowledge will get you an optimum solution faster.
